-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --
Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Remarks

This is a response to the restriction requirement made 12/10/2008 by selecting claims 13-20 for patent examining while withdrawing claims 1-12 without traverse.

Specification

The specification has been checked to the extent necessary to determine the presence of all possible minor errors. However, the applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

Art Unit: 2821

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 13-20 are rejected under 35 U.S.C. 102(b) as being anticipated by Muthu et al. (US Pat. 6,441,558).

Like claim invention, Muthu discloses a memory arrays of a controller (34) as a computer readable medium storing a computer program (Figs. 1 and 2) comprising: computer readable code for transmitting a command signal to each light source of the plurality of light sources;

computer readable code for sequentially activating the light sources based on command signals (user input, sensing signals); and

computer readable code for determining an intensity value for each light source (col. 8, lines 5-39)

wherein computer readable code for sequentially activating the light sources based on the command signals comprises: computer readable code for activating each light source individually, determining a control signal based on the intensity value of each light source; and computer readable code for controlling the light sources with the control signals (col. 5, lines 10-58) and wherein the computer readable code for converting the received light signals to digital light signals (col. 8, lines 5-11); and computer readable code for analyzing the collected light signals to determine the intensity value for each light source. wherein the computer readable code for analyzing the received light signals comprises: computer readable code for comparing the digital light signals to a

reference value; and computer readable code for determining the intensity value based on the comparison, wherein the reference value is a predetermined value (col. 8, lines 21-53).

Citation of pertinent prior art

3. The prior art made of record and not relied upon is considered pertinent to applicants' disclosure. See prior arts/references listed on the PTO-892 form attached.
